

4PL_pure_rlu m39

BICc = 29222.91 AIC = 28695.63

	random effect	mab_virus effect	run_id effect	goes_down effect
L	Yes	No		Yes
m	No	Yes		Yes
e	Yes	No		Yes
alpha	No		Yes	
k	No		Yes	

*Note: U is not an estimated parameter in this model -- it is derived deterministically as $U = \text{mean_vc} * (1 - \text{edge})$, so it has no toggle row here.*

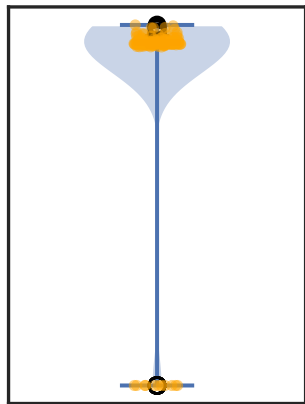

Binary design matrix ordered by BICc
