

4PL_pure_rlu m63

BICc = 28941.47 AIC = 28271.77

	random effect	mab_virus effect	run_id effect	goes_down effect
L	Yes	Yes		Yes
m	Yes	Yes		Yes
e	Yes	No		Yes
alpha	No		Yes	
k	No		Yes	

*Note: U is not an estimated parameter in this model -- it is derived deterministically as $U = \text{mean_vc} * (1 - \text{edge})$, so it has no toggle row here.*

Binary design matrix ordered by BICc
