

4PL_pure_rlu_v2 m11

BICc = 59696.88 AIC = 59229.36

	random effect	mab_virus effect	run_id effect	goes_down effect
U_offset	No	No		Yes
L	No	No		Yes
m	Yes	No		Yes
e	Yes	No		Yes
alpha	No		Yes	
k	No		Yes	

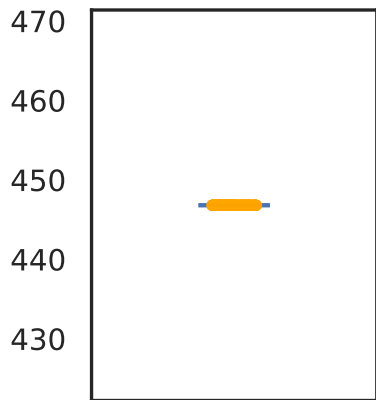

*Note: U itself is still not directly estimated -- it is derived as
 $U = \text{mean_vc} * (1 - \text{edge}) - \exp(U_offset)$, using the U_offset row above.*

Binary design matrix ordered by BICc
